# ABOUT unival group

unival group GmbH is a German group of companies headquartered in Bonn providing advanced security solutions to government authorities and corporate clients globally. Our mission is to ensure safety and security across multiple sectors. We deliver comprehensive technologies and consultancy services that enable organizations to safeguard their people, assets and infrastructure.

With over 500 successful projects completed across 87 countries worldwide, unival has established a strong presence and reputation in the security industry. As a German organization, we guarantee our international clients the highest standards of quality, customer-focused services, and absolute reliability.

With a strong focus on security solutions for government organizations, NGOs, and multinational corporations, we develop and produce both individual products and integrated security systems tailored to meet local requirements. Our expertise, built over 20 years of international business development, ensures turnkey project execution, even in high-risk, challenging environments.

# USG - unival SPECTRUM GUARD SERIES

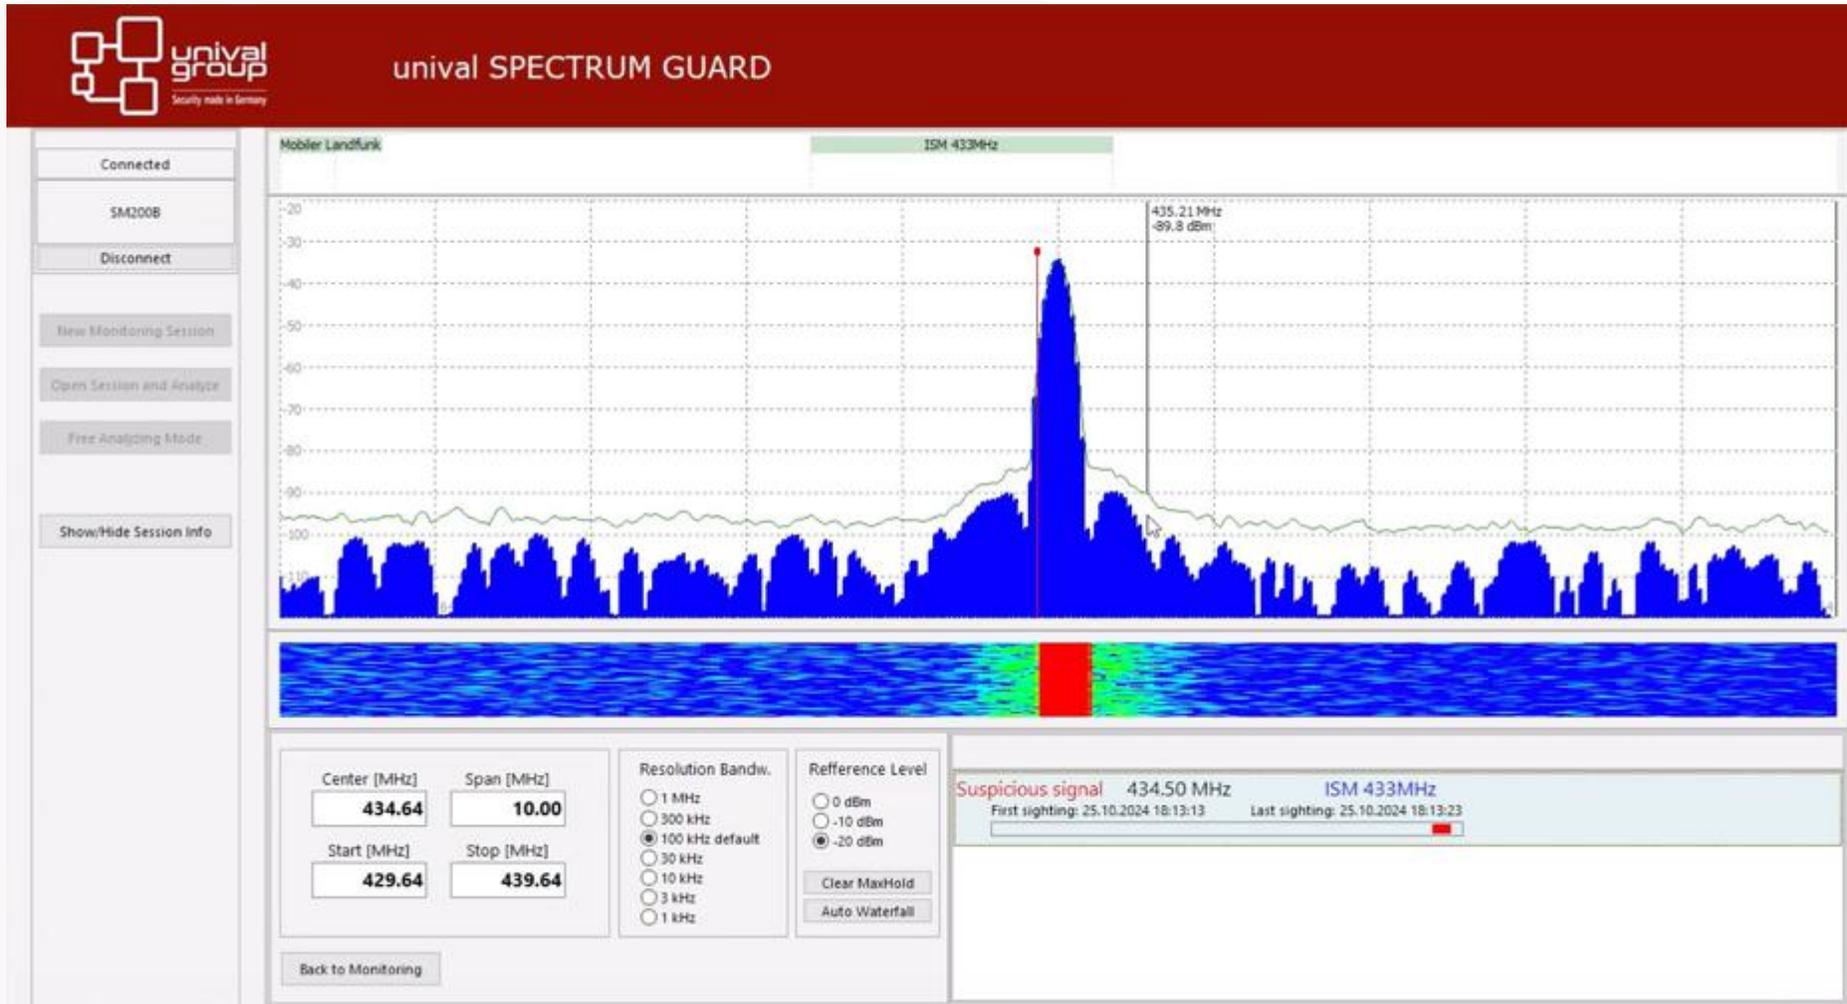

The screenshot displays the unival SPECTRUM GUARD software interface. At the top left is the unival group logo. The main header area is dark red with the text "unival SPECTRUM GUARD" in white. On the left side, there is a vertical sidebar with several buttons: "Connected", "SM200B", "Disconnect", "New Monitoring Session", "Open Session and Analyze", "Free Analyzing Mode", and "Show/Hide Session Info". The central area is divided into two main sections. The left section, titled "Session Info", contains the following data:

Mode:	Analyzing historical session
Session Name:	Test
FStart:	10.00 MHz
FStop:	10000.00 MHz
Learning start time:	25.10.2024 17:53:41
Learning end time:	25.10.2024 18:04:30
Learning duration:	10 Min 49 Sec
Monitoring start time:	25.10.2024 18:09:02
Monitoring end time:	25.10.2024 18:14:12
Monitoring duration:	5 Min 9 Sec
Sporadic signals:	12
Suspicious signals:	1

Comment:

The right section of the interface shows a spectrum plot with a frequency range from 10.00 MHz to 10000.00 MHz. A prominent red vertical line is positioned at 10.433 MHz, labeled "ISM-433MHz". The plot shows a blue signal at the bottom and a green signal at the top. The top right corner of the plot area has a "DVB-T2" label.
